who uses drones to  
capture amazing photos!

Pippa &  
Dronie

**Monica Edgar**  
Country Manager

Monica is a Yawuru Country Manager, and her team use drones to help keep their land healthy.

# Dronie Rulebook

Dronie will complete a safety checklist before takeoff and be aware of those around her at all times.

Dronie can fly as high as 120m.

Dronie must keep a distance of 30 metres from everyone when flying and can not fly over the top of others.

Dronie's pilot must be able to see her with their own eyes while flying.

Dronie can take photos and videos with consent.

Dronie will check that she has approval to fly, e.g. in schools, national parks, and other public areas.

Dronie feels safer when her pilot has a co-pilot.

Dronie must stay 5.5km away from airports. If she sees an aircraft nearby, she must land quickly and safely.

Dronie can fly when the sun is shining and the wind is low, but not through cloud or fog.
